## Relatório - Exercise (part 2) – Drug targeting - Resultados

# b) Compute the specific growth rate under adequate conditions for your organism? What are the main products excreted under each of those circumstances?

## c) List all genes/reactions that can be potential drug targets

### Genes Essenciais obtidos através do MEWpy e a sua contagem (146)

```

d) Discuss two of these genes/reactions and the corresponding drug. Select one present in the host and one absent. Include in the discussion facts regarding potential side effects of the drug on other reactions.

Exemplo de output da função desenhada para identificação dos genes do modelo, e verificar se estes são humanos

glmS YPO4118 glucosamine--fructose-6-phosphate aminotransferase acpP Warning: This is an Human target aswell YPO1600 acyl carrier protein
